

keno

Quick Reference Guide

Introduction to Keno

Base Cost: \$1, \$2, \$3, \$4, \$5, \$10 or \$20 per drawing **Drawings:** Every 4 minutes (approximately 298 drawings per day)

Sales Cutoff: 2 seconds before the drawing

Drawings Begin: 5:49 AM **Drawings End:** 1:37 AM

Keno is drawn at random from among the numbers 1 to 80. Players try to match up to 10 numbers (known as SPOTS) per draw. The more SPOTS players match, the more they can win (see Prize Levels).

Players must use a playslip to choose numbers for each of their desired SPOTS or select Quick Pick to allow the computer to choose them at random.

Adding the Keno Multiplier option will multiply the prize for a winning play depending on the Multiplier drawn (2X, 3X, 4X, 5X or 10X). For example, if a Keno play wins \$10, the Keno Multiplier option was chosen at purchase, and the Multiplier drawn was 3X, the player's prize would be \$30. Adding the Keno Multiplier triples the total play cost (\$1 base play + \$2 Multiplier = \$3 ticket).

Players can also choose to play the same numbers for 1, 2, 3, 4, 5, 10 or 20 consecutive draws. The maximum play cost per playslip is \$1,200.

Prizes up to and including \$2,500 can be validated and paid at any PA Lottery retailer. Players with winning tickets over \$600 must file a Claim Form. For prizes over \$2,500, a standard Claim Form must be completed and submitted to Lottery for payment. Winning tickets may be redeemed up to one year following the drawing date for which they were purchased.
